3D PRINT CONGRESS & EXHIBITION POSTPONED TO APRIL 2022 IN LYON
LAUNCH OF 3D PRINT CONGRESS & EXHIBITION IN PARIS

3D Print Congress & Exhibition postpones to 5 to 7 April 2022 in Lyon and launches a new edition this coming autumn in Paris.

4 months before the event, the health context persists and leaves some doubt of an ending crisis. As well as the FIP-France Innovation Plasturgie exhibition generates long preparation periods, 3DPrint show has decided to postpone to April 2022.

"Furthermore, all industries have seen rising the emergency to rethink their manufacturing processes and supply chains with flexibility, performance and reindustrialisation these last months. This compelling awareness, combined with ambitious economic recovery plans, represent a unique opportunity to adopt the A.M. technology," comments the organiser.

In order to meet this urgent need, 3D Print Congress & Exhibition proposes a new event this autumn in Paris to promote the latest A.M developments.

3D Print Congress & Exhibition Paris/ Lyon: 2 meetings, i.e. twice as much business at the service of a booming sector.

This show is organized by IDICE, subsidiary of INFOPRO DIGITAL group.

IDICE is a professional trade shows organizer: France Innovation Plasturgie (FIP), 3D PRINT Congress & Exhibition, LUXE PACK Monaco, LUXE PACK New York, LUXE PACK Los Angeles, LUXE PACK Shanghai, Édition Spéciale by Luxe Pack.

IDICE belongs to the INFOPRO Digital group, leader in BtoB multi-media products and solutions (3 200 employees, 440 M€ turnover) in various key sectors: construction, automotive, industry, insurance, finance, distribution, tourism and local authorities.
